

MD SIBTAIN RAZA KHAN

Bengaluru, KA • +91-8697964511 • sibtainshafique@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

AI/ML engineer with a strong foundation in Python, Java, and SQL. Experienced in building and deploying machine learning models and working with data-driven systems. Familiar with generative AI tools and cloud platforms, with a focus on developing scalable and efficient solutions for real-world applications.

TECHNICAL SKILLS

Languages: Python, Java, SQL

Data & Libraries: Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow

BI & Visualization: Power BI, Microsoft Excel, Data Visualization

Cloud & Data Platforms: Microsoft Azure (AI Fundamentals), Supabase, Azure Data Factory (learning)

AI Tools: Generative AI assistants, coding copilots, AI-assisted debugging & documentation

Dev Tools: Jupyter Notebook, MySQL Workbench, VS Code, GitHub, version control

Soft Skills: Problem-solving, adaptability, teamwork, technical documentation, agile mindset

WORK EXPERIENCE

Data-Driven Operations Analyst | Conduent – UPS Operations Oct 2025 – Present

- Analyzed complex, multi-variable shipment data to recommend optimal service configurations, applying data-to-decision workflows directly analogous to analytics.
- Managed high-volume operational data streams under strict SLA targets, maintaining accuracy under ambiguity — mirroring real-world data quality triage and monitoring demands.
- Identified recurring anomaly patterns in customer escalations and documented structured resolution workflows, building process documentation skills.
- Maintained 95%+ quality scores through systematic root-cause analysis and structured problem-solving frameworks, demonstrating rigor aligned with data validation practices.

PROJECTS

FinComp AI® | *Python, Supabase, AI Tools* Ongoing

- Built an end-to-end MVP SaaS platform automating GST/TDS compliance — including data ingestion, anomaly detection pipelines, compliance scoring logic, and audit-ready report generation.
- Designed and implemented data transformation and quality-check workflows analogous to ETL pipeline development, ensuring data freshness and correctness.
- Leveraged AI coding assistants for code generation, debugging, and documentation, applying human judgment to validate all AI-generated outputs.

Medicine Advisor Engine® | *Python, TF-IDF, Linear SVC* May 2025

- Developed a disease-prediction model achieving 92% accuracy using TF-IDF vectorization and Linear SVC, showcasing feature engineering and model validation relevant to ML support workflows.
- Built a conversational interface reducing symptom-to-diagnosis time by 40%, demonstrating ability to prepare feature-ready datasets and validate model outputs for correctness.

Music Recommendation via Facial Recognition® | *CNN, Spotify API* June 2024

- Implemented a CNN-based emotion detection system with 90%+ accuracy, integrated with Spotify API via RESTful calls, building experience with API integrations between data platforms.
- Improved music match accuracy by 35% and boosted user engagement by 20% through iterative model evaluation and data-driven tuning.

EDUCATION

B.Tech – Computer Science (AI & ML) | REVA University, Bengaluru 2021 – 2025

12th – CBSE | Sri Chaitanya Techno School, Vizag 2021

10th – ICSE | St. Thomas Church School, Kolkata 2019

CERTIFICATIONS

Azure AI Fundamentals (Microsoft) • Machine Learning (IBM) • Python 101 for Data Science (IBM) • Data Analyst Career Path (DataCamp) • Introduction to Cloud (IBM)

INTERESTS & ACTIVITIES

State-level Cricket Player • Psychology & Behavioural Science • Chess (Strategic Gameplay)
