

MD SIBTAIN RAZA KHAN

Bengaluru, KA • +91-8697964511 • sibtainshafique@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

AI/ML Engineer with a strong foundation in Python and SQL, specializing in building and deploying machine learning models and data-driven systems. Experienced with generative AI, NLP pipelines, and cloud platforms, with a track record of delivering scalable, production-ready solutions for real-world applications.

TECHNICAL SKILLS

Languages: Python, SQL

AI & Automation: Generative AI, Prompt engineering, AI-assisted workflows, Automation tooling

ML & Data: Scikit-learn, TensorFlow, TF-IDF, Linear SVC, Pandas, NumPy, Matplotlib

Analytics & Product: Funnel analysis, KPI tracking, Dashboarding, Analytical thinking

Platforms & APIs: REST APIs, Supabase, Workflow automation, Structured data pipelines

Dev Tools: GitHub, VS Code, Jupyter Notebook, Version control

Soft Skills: Problem-solving, adaptability, Teamwork, Technical documentation, Agile mindset

WORK EXPERIENCE

Data-Driven Operations Analyst | Conduent – UPS Operations

Oct 2025 – Present

- Analyzed operational workflows and customer interaction patterns to identify inefficiencies and deliver actionable process improvement recommendations.
- Collaborated cross-functionally to maintain workflow reliability across high-volume operational systems under strict SLA targets.
- Identified recurring escalation trends through structured root-cause analysis and contributed to ongoing workflow optimization initiatives.
- Sustained 95%+ quality scores through consistent analytical monitoring, root-cause analysis, and continuous improvement practices.

PROJECTS

[MedinexAI@](#) | [Website](#) | Python, TF-IDF, Linear SVC

May 2025

- Built a full-stack AI healthcare platform that analyzes natural language symptom descriptions and classifies potential diseases using NLP-based extraction and ML classification.
- Engineered a disease prediction pipeline with TF-IDF vectorization and Linear SVC, achieving 92% model accuracy; integrated confidence scoring, severity assessment, and emergency symptom detection.

[FinComp AI@](#) | Python, Supabase, AI Tools

Ongoing

- Developed an AI-powered fintech SaaS platform automating GST/TDS compliance through data ingestion, anomaly detection, compliance scoring, and audit-ready report generation.
- Designed scalable data processing workflows with AI-assisted automation to streamline financial compliance analysis and reporting at scale.

[Music Recommendation via Facial Recognition@](#) | CNN, Spotify API

June 2024

- Built a CNN-based real-time emotion detection engine integrated with the Spotify API for dynamically personalized music recommendations.
- Improved recommendation relevance and user engagement through iterative model experimentation, API integration, and behavioral pattern analysis.

EDUCATION

B.Tech – Computer Science (AI & ML) | REVA University, Bengaluru

2021 – 2025

12th – CBSE | Sri Chaitanya Techno School, Visakhapatnam

2021

10th – ICSE | St. Thomas Church School, Kolkata

2019

CERTIFICATIONS

• Azure AI Fundamentals (Microsoft) • Machine Learning (IBM) • Python 101 for Data Science (IBM) • Data Analyst Career Path (DataCamp) • Introduction to Cloud (IBM)

INTERESTS & ACTIVITIES

• State-level Cricket Player • Psychology & Behavioural Science • Chess (Strategic Gameplay)
